

Pre-Enrollment Third Party Liability (TPL) ID

Existing state Medicaid TPL processes force states to pay for members initially and learn whether they maintain alternative coverage months in the future. Public Consulting Group (PCG) can provide states with this information at the moment of application, avoiding the need to “pay and chase,” and ensuring states can collect more than the just 20 cents for every dollar paid out that current processes support.

The U.S. Government Accountability Office (GAO) estimates that 13% of Medicaid members maintain alternative insurance coverage. PCG has established real-time access with more than 900 of the nation’s largest commercial insurance carriers, as well as Medicare, TRICARE, and Medicaid Managed Care plans.

With 85 million enrollees costing the government more than \$800 billion annually, more than \$8.6 billion is being unnecessarily spent each month on Medicaid members who maintain alternative insurance coverage. Our access allows us to both identify and verify- before a member is enrolled into Medicaid the existence of alternative coverage the moment someone applies for Medicaid, prior to an agency paying out a single dollar in unnecessary claims.

The government currently collects just 20 cents on every dollar spent on enrolled members, meaning that nearly \$6.9 billion of this unnecessary spending will never be collected. With PCG’s help, for every 1 million covered Medicaid members, states can transition more than \$40 million in spending to commercial or federal insurer carriers.

PCG maintains exclusive access with more than 900 of the nation’s largest carriers and can instantly identify and verify:

- Commercial insurance coverage
- Medicare coverage
- Medicaid managed care plan coverage in all 50 states
- TRICARE coverage, including TRICARE East and West, Wisconsin Physicians Service (WPS), Military–TRICARE for Life, Military–TRICARE Overseas, U.S. Department of Veteran Affairs (VA) Fee Basis, Civilian Health and Medical Program (CHAMP) VA, and Civilian Health and Medical Program of Uniformed Service (CHAMPUS)
